

Bio-Waste → **Compost**

CLEAN VILLAGE * RICH SOIL

Farmers can now prepare Organic manure with only Rs.20/- to grow crops throughout the year

Waste Decomposer

To keep villages clean under **Swachha Bharat Abhiyan**, National Centre of Organic Farming, Ghaziabad (Government of India, Department of Agriculture, Cooperation & Farmers Welfare) has developed a new technology to convert animal dung & village bio-waste into good quality organic manure with very low cost. There is no need of pit or standard structure to apply this technology.

Regional Centres of Organic Farming : Bangalore – 080-28450503;
Bhubaneswar – 0674-2721281; Imphal – 0385-2413239; Nagpur – 07118-297054; Jabalpur – 0761-2904320; Panchkula – 0172-2564460; Ghaziabad – 0120-2764212 and Patna

Benefits

- Bio-waste can be decomposed using solution of 200 litre water + 2 kg jaggery (Gur) prepared using one bottle of Waste Decomposer. 10 litre of solution can be used for further multiplication.
- Compost is prepared easily in 30-40 days with this culture.
- More than 1000 Ton compost can be prepared with single bottle costing just Rs.20/- only.
- The culture can be used for many years.
